Scenario:

You are a first year student to the University of South Carolina majoring in Computer Science. You are frustrated by how many websites you have to log into to upload documents to the University. You would like to be able to see what documents you need to upload and be able to upload all of them from one place.

Task 1:

Login to the app and open your earliest deadline.

Task 2:

Upload the necessary document to fulfil this deadline.

Task 3:

Go back to the home screen and check when the University has received your uploaded document.

Notes:

What needs to be changed in the application?
1. A back button needs to be added from the deadline screen.
2. A remember me button needs to be added to the login screen
3. A done button needs to be added to the upload screen

What needs to stay the same in the application?
1. The calendar on the home screen.
2. Logging in with VIP ID and password.
3. The deadline vanishing when it has been completed.
